### REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

The present invention relates to a method for driving an organic electroluminescent display device, which uses an organic electroluminescent light emitting element. The prior art of record does not teach or suggest driving the organic electroluminescent element by an electric charge control driving method when an ambient temperature is higher than a prescribed temperature, the electric charge control driving method comprising supplying electric charges to a column electrode in the set of column electrodes and then placing an output from a driving circuit to the column electrode in the set of column electrodes in a high impedance state; driving the organic electroluminescent element by the electric charge control driving method when the ambient temperature is not higher than the prescribed temperature and when a light-emission luminance in a maximum gray scale is a relatively low luminance; and driving the organic electroluminescent element by a capacitive charge driving method when the ambient temperature is not higher than the prescribed temperature and when the light-emission luminance in the maximum gray scale is a relatively high luminance, the capacitive charge driving method comprising supplying a constant current to the column electrode in the set of column electrodes after performing the capacitance charge, and then applying a constant voltage to the column electrode in the set of column electrodes to turn off a pixel.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
